

CLAIMS

I claim:

1. A lollipop with a central node comprising:
a plurality of first members extending radially from the central node; and
5 at least one candy affixed to the distal end of at least one of said first members.
2. A lollipop as in claim 1, further comprising:
at least one candy affixed to the distal ends of a plurality of said first members so that at least two candies share a diametrically opposed configuration across
10 the central node.
3. A lollipop as in claim 1, further comprising:
at least one second member secured to the distal end of at least one of said first members.
4. A lollipop as in claims 1, further comprising:
15 at least one candy affixed to the central node.
5. A lollipop as in claim 2, further comprising :
at least one candy affixed to the central node.
- 6 A lollipop as in claim 2, further comprising:
at least one candy affixed to the distal end of at least one of said first
20 members so that the candy is radially offset with respect to the central node.
7. A lollipop as in claim 5, further comprising:
at least one candy affixed to the distal end of at least one of said first members so that the candy is radially offset with respect to the central node.
8. A lollipop as in claim 3, further comprising:
25 at least one candy affixed to the distal end of at least one of said first members so that the candy is radially offset with respect to the central node.
9. A lollipop as in claim 3, further comprising:

at least one candy affixed to the central node.

10. A lollipop as in claim 9, further comprising:

at least one candy affixed to the distal end of at least one of said first members so that the candy is radially offset with respect to the central node.

5 11. A lollipop as in claim 2, further comprising:

at least one second member secured to the distal end of at least one of said first members.

12. A lollipop as in claim 11, further comprising:

at least one candy affixed to the distal end of at least one of said first members so
10 that the candy is radially offset with respect to the central node.

13. A lollipop as in claim 11, further comprising:

at least one candy affixed to the central node.

14. A lollipop as in claim 13, further comprising:

at least one candy affixed to the distal end of at least one of said first members so
15 that the candy is radially offset with respect to the central node.

15. A lollipop as in claim 4, further comprising:

at least one candy affixed to the distal end of at least one of said first members so
that the candy is radially offset with respect to the central node.
